

Amber **i2** 2-in / 2-out Professional 24-bit / 192 kHz USB-C Audio Interface

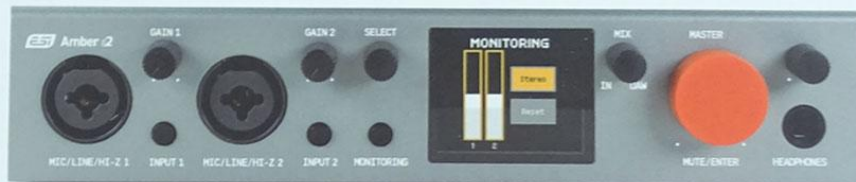

Two Amber Class-A Mic-Pres and Inputs
Our most sound-true preamp yet with a little vintage sprinkle. Make your mics sound better than ever.

Two Hi-Z Instrument Inputs
High impedance inputs to ignite your guitar performances.

Two Line Inputs
Connect and record your line signals (TRS) with high quality balanced line level inputs.

Ultra Dynamic Conversion
Newly developed, professional audio AD / DA converters deliver high-end quality with 115dB(A) dynamic range.

ADM - Advanced Direct Monitoring
Control the monitoring level of all incoming signals directly and independently on the hardware and mix input and DAW signals.

Virtual Channels / Loopback
For the streamers and podcasters out there, we bring you multiple internal virtual channels additionally to the physical connections.

Class Compliant / Low Latency
100% class compliant for the highest compatibility and EWDM based ultra low latency drivers supporting ASIO and CoreAudio. Works with macOS and Windows and many mobile devices such as iPhone or iPad and others.

Variety of Outputs
Ultra-powerful outputs with low-noise playback characteristics - headphones and balanced line outputs.

Studio Software included
A collection of state-of-the art audio software tools turns your ideas into music.

USB-C Bus Powered
With optional 5V DC port for additional power when needed.

Two Autodetect MIDI Ports
2 MIDI ports with automatic I/O detection. Use them as 2 outputs, 2 inputs or 1 input / 1 output for your master keyboard, controllers and synthesizers.
