

# B-6 PRO

WIRELESS SYSTEM FOR WIND INSTRUMENT

## Features

|                             |                             |
|-----------------------------|-----------------------------|
| • Operating Frequency Band: | 2400-2483.5MHz              |
| • Operation range:          | Up to 50 m (165 ft) maximum |
| • Latency:                  | >3.6ms                      |
| • Audio Quality:            | 24bit/48kHz                 |
| • Frequency Response:       | 20Hz-20kHz                  |
| • THD+Noise:                | Less than 0.01%@1kHz        |
| • OUTPUT Dynamic Range:     | 112dBA                      |

|                                                      |                              |
|------------------------------------------------------|------------------------------|
| • TX (Transmitter) Battery Life:                     | Up to approximately 7 hours  |
| • RX (Receiver) Battery Life:                        | Up to approximately 11 hours |
| • Booster (0dB-12dB)                                 |                              |
| • Send/Return circuit                                |                              |
| • Digital tuner for wind instrument                  |                              |
| • 13 preset equalization curves for wind instruments |                              |
