

SideKick

The SideKick DIB-445 is a 48V phantom powered active DI box that makes it easy to connect your instrument to a DAW or mixing console. It features an on-board transformer to convert an unbalanced instrument-level signal to a balanced line-level signal, and is designed for use with low-level, high-impedance signals, such as guitars with passive pickups.

When it comes to connecting your instruments for virtually any live sound or recording application, Hosa SideKick DI Boxes have you covered.

Features:

- Unbalanced 1/4" Input, 1 Unbalanced 1/4" Thru Output, and 1 Balanced XLR Output
- Runs on 48V Phantom Power
- Pad Switch (0dB, -15dB, -30dB of attenuation)
- Ground Lift Switch
- Polarity Flip Switch
- One-Year Warranty

Please Recycle
