

INTERVIEW GO™

HANDHELD ADAPTOR FOR THE WIRELESS RANGE

The Interview GO is an adaptor that converts the Wireless GO and any other RØDE Series IV wireless transmitter into a compact handheld interview microphone. With an ergonomic design and included windshield for further reducing wind noise and plosives, it's never been simpler to capture professional wireless audio for your interviews. Available in a range of bold colours, alongside the classic black finish, you can choose to stand out in the crowd or opt for a discreet and professional on-camera presence.

- Converts any RØDE Series IV wireless transmitter into a handheld microphone
- Includes sturdy handle and removable windshield
- Compatible with Wireless GO (Gen 3), Wireless PRO, Wireless ME, Wireless GO II and Wireless GO
- Available in classic black and a range of bold colours
