

NUX

NSP-10

Sustain Pedal

Thank you for selecting the NUX NSP-10 sustain pedal. The NSP-10 is a universal sustain pedal compatible with a wide range of electronic musical instruments, including, but not limited to, MIDI keyboards, digital pianos, and synthesizers. To ensure you can fully explore the NUX NSP-10's capabilities from the start, please take a moment to read through this manual before your first use.

Features

- High quality chrome foot pedal.
- Polarity switch for universal compatibility.
- Full size piano-style pedal with a substantial anti-slip rubber bottom.

Parts and Operation

Polarity Switch

Use this switch to set the polarity of the NUX NSP-10 to either "Normal Open" or "Normal Close."

Operation Guide

1. Check the polarity of the instrument you intend to use and adjust the polarity switch accordingly.

2. Connect the plug of the NUX NSP-10 to the instrument's pedal jack.

3. Place the NUX NSP-10 on a flat surface, then press and hold down the foot pedal for the desired duration to activate its function.

Precautions

- Avoid using the NUX NSP-10 in high-temperature, humid, foggy, or harsh environments.
- Do NOT attempt to disassemble the unit, as intentional damage is not covered by the warranty.
- Please retain this manual for future reference.

Specifications

*Specification may change without notice.

Accessories

- Owner's manual
- NUX sticker

FCC Warning

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) this device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

Any changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

Note: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation.

If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help. The device has been evaluated to meet general RF exposure statement. The device can be used in portable exposure condition without restriction.

The device has been evaluated to meet general RF exposure requirement. The device can be used in portable exposure condition without restriction.
