

- 1** Place your cymbal on your cymbal stand and your cymbal pad on top of the post as you always do
- 2** Using two fingers, squeeze inward to expand the aperture of your PinchClip
- 3** Slide the PinchClip down onto the post into the desired position and release
- 4** Play (Wasn't that easy?)
- 5** To remove, simply pinch and lift the PinchClip

For hi-hat, install your top cymbal on your clutch but secure it with a Pinch Clip instead of the dreaded threaded lock nut
